

CLAIMS

We claim:

1. Flexible self-adhesive element for wigs, characterized in that it is composed of a flexible fabric (2), at least one side of which is coated with a thin polysiloxane coating or film (3).

2. Flexible self-adhesive element as referred to in claim 1, characterized in that the support fabric (2) is composed of an elastic fabric.

3. Flexible self-adhesive element as referred to in claim 2; characterized in that the support fabric (2) used can be stretched in various directions.

4. Flexible self-adhesive element as referred to in any one of the claims numbered 1 to 3, characterized in that the weight of the polysiloxane coating or film (3), placed on the fabric (2), is between 100 and 300 g/m².

5. Flexible self-adhesive element for wigs, as referred to in any one of the claims numbered 1 to 4; characterized in that the polysiloxane that constitutes the coating (3) is a single-component polysiloxane.

6. Flexible self-adhesive element for wigs, as referred to in any one of the claims numbered 1 to 5; characterized in that the polysiloxane that constitutes the coating (3) is a solvent-free polysiloxane.

7. Wig characterised in that the inner surface (5) of its cap, is composed at least in part, of flexible self-adhesive parts (1) according to one or more of the claims numbered 1 to 6, and whereof the inside surface is composed of a coating or film of polysiloxane (3) which is positioned in such a way that it comes into contact with the skin of the user's crown, when the wig is worn.

8. Wig as referred to in claim 7 whose wig cap is composed of strips of elastic fabric onto which "wefts" supporting the hair are sewn, characterized in that, at least in part, certain strips composed of flexible self-adhesive elements (2-3) are used according to one or more of the claims numbered 1 to 6.

9. Wig as referred to in claim 8, characterized in that the elastic strips (1) on to which the "wefts" supporting the hair are attached (6), are composed of flexible self-adhesive elements (2-3) according to any one of the claims numbered 1 to 6.

10. Wig as referred to in claim 8 or 9, characterized in that the hair (6), real or artificial, is implanted directly on to the flexible and self-adhesive strips.
